SPONSORSHIP & EXHIBITION PROSPECTUS

FROM NEUROTECHNOLOGIES TO COMMUNITY CARE
MESSAGE

Dear Sponsor,

The World Federation for NeuroRehabilitation, WFNR, is the world body for neurorehabilitation and it hosts a scientific congress, the World Congress of Neurorehabilitation, WCNR, every two years where world experts gather to share best practices.

The Indian Federation of NeuroRehabilitation (IFNR) is a premier organization of neurorehabilitation experts. It is the multidisciplinary body in India representing neurologists, neurosurgeons, physiatrists, neuropsychologists, physical therapists, occupational therapists, speech therapists, and other professionals taking care of people with neurological disabilities.

It is a matter of great pride that the IFNR has won the bid to host the prestigious WCNR in India for the first time. The WCNR 2018, India meeting is scheduled for 7th to 10th February, 2018 at the Renaissance Hotel Convention Centre, Powai, Mumbai and we are expecting about 3000 doctors and therapists from across the globe to attend this event.

In developing countries, as health care improves, there is reduced mortality but increased morbidity and neurologic disability has become a hidden epidemic. A recent paper (Neurology, 2012) highlighted that in India there has been a marked increase in disabilities due to traumatic brain injury, dementias and stroke. Together, these three account for disability in 3.5 million new cases every year, about 11,000 cases every day. Additionally, there are millions of people with disability due to spinal cord injuries, Parkinson’s Disease, multiple sclerosis, cerebral palsy and other learning disabilities.

As sponsors of WCNR 2018, you will have a unique opportunity to not only showcase your company and its products to a large gathering of neuroscientists from across the world, but also support the effort to create a platform for greater awareness and development of neurorehabilitation services in India and other developing countries.

We believe in the T.E.A.M spirit – ‘Together Everyone Achieves More’. Your valuable inputs and participation are crucial in making this conference a historical success. Let us join hands and come together to make a difference and improve the lives of people with neurological disability.

The Indian Federation of NeuroRehabilitation (IFNR) is the premier organization of neurorehabilitation experts. It is the apex, multidisciplinary body in India representing neurologists, neurosurgeons, physiatrists, neuropsychologists, physical therapists, occupational therapists, speech therapists, and other professionals taking care of people with neurological disabilities. IFNR is affiliated to the World Federation for Neurorehabilitation (WFNR).

India is undergoing an economic transition. There is improved health care systems and a consequent decrease in mortality in patients with neurological diseases. However, there has been an increase in morbidity due to an emergence of disorders attributed to changing life styles and an ageing population. There has been a marked increase in disabilities due to traumatic brain injury, dementias and stroke. India has become the head injury capital of the world due to road traffic accidents. Stroke is one of the leading causes of death and disability in India. Together, they account for disability in 3.5 million new cases every year, about 11,000 cases every day. Additionally, there are millions of people with disability due to spinal cord injuries, Parkinson’s disease, multiple sclerosis, cerebral palsy and learning disabilities.

This epidemic of neurologic disability has placed a huge burden on our country, both economically and on the overall quality of life of our society. The key challenges for the majority population are lack of “Awareness, Availability, Accessibility and Affordability” of neurorehabilitation services. At the moment, the number of trained professionals handling the millions of people with neurological disabilities is small. However, there is a growing interest in the field at Government and local level.

The primary objectives of IFNR are to bridge these gaps. It aims to provide a platform where the multidisciplinary team can interact and formulate guidelines for neurorehabilitation with the Indian perspective due to the unique socio-demographic profile of our country, create advocacy for the people and families suffering from neurological disease with disability, imparts training to create empowered manpower to manage persons with neurological disability, promote clinical research in the field of neurorehabilitation and propagate the important concept of impairment management and prevention of disability in patients with neurological diseases.

IFNR holds an annual scientific meeting, supports educational initiatives and provides scholarship to young professionals in the field to attend national and international meetings in the field of neurorehabilitation.
